

TRUE OR FALSE? RIGHT OR WRONG?

Help Jen get her dog Inja to the vet, Dr. Dube, to be neutered.

The problem is that people keep on confusing them by making FALSE statements. Show them the correct path by colouring in all the boxes that have TRUE statements. On the back, rewrite the false statements to make them true.

<p>START</p> 	<p>Spaying and neutering will help make sure that dogs and cats get to live longer and have healthier lives.</p>	<p>The operations can help prevent the dogs and cats from getting certain types of cancers.</p>	<p>Neutering cats reduces their urge to spray and mark their territory.</p>
<p>It is better for dogs and cats to have one litter of puppies or kittens, before being spayed.</p>	<p>The SPCA is able to find homes for all the stray, abandoned and unwanted animals in their care.</p>	<p>It costs far too much money to spay and neuter. There is no value for money.</p>	<p>By having dogs and cats sterilised, we can help reduce the animal overpopulation problem.</p>
<p>South Africa spends millions of Rands to control unwanted companion animals.</p>	<p>Sterilising will not change an animals temperament or personality.</p>	<p>Dogs and cats will get fat and lazy after they have been spayed and neutered.</p>	<p>Animals that have not been sterilised, often have more behaviour problems.</p>
<p>Neutering animals can make them less likely to want to fight.</p>	<p>Dogs and cats make better companions if they have been spayed and neutered.</p>	<p>Sterilised animals are more aggressive and will bite you.</p>	<p>It is okay for my animal to have a litter if I find homes for the babies.</p>
<p>Sterilisation makes animals less likely to roam or run away from home.</p>	<p>Most cats and dogs can be spayed and neutered at about 12 weeks of age.</p>	<p>The SPCA and Veterinarians can advise you on when to sterilise an animal.</p>	<p>END</p>
